```
# Main UI for setting up GridWichterle.

* @author Michal Matl (michal.matl@inmite.eu)

#/
public class SettingsActivity extends FragmentActivity {
    private Config mConfig;

@Override
protected void onCreate(Bundle savedInstanceState) {
    super.onCreate(savedInstanceState);
    setContentView(R.layout.activity settings);
    ButterKnife.inject(this);
    Intent intent = new Intent(this, GridOverlayService.class);
    startService(intent);
    setupViews();
}
```

当一个XML中元素实在过多的时候,手动绑定id,不但浪费时间,而且非常的麻烦,有了这个黑科技之后,就可以轻松很多,解放双手啦。这是一个Android的插件,它是基于ButterKnife开发的,想要安装这个需要先添加Butterknife的 依赖,具体步骤如下:

添加Butterknife依赖

```
dependencies {
  compile 'com.jakewharton:butterknife:8.5.1'
  annotationProcessor 'com.jakewharton:butterknife-compiler:8.5.1'
}
```

```
buildscript {
  repositories {
    mavenCentral()
  }
  dependencies {
    classpath 'com.jakewharton:butterknife-gradle-plugin:8.5.1'
  }
}
```

```
apply plugin: 'com.android.library' apply plugin: 'com.jakewharton.butterknife'
```

依赖添加完毕, 安装插件

in Android Studio: go to Preferences → Plugins → Browse repositories and search for ButterKnife Zelezny

安装完毕后,只需要重新启动一下studio,然后右键R.layout.activity_main,选择Generate,然后选择Generate ButterKnife Injections,就ok啦~
